## PREFATORY NOTE

THIS seventy-fifth yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1911, and also of some received too late for inclusion in the seventy-fourth issue.

The commencement of a new five-yearly period of the Catalogue has been taken as the opportunity to introduce some modifications in the details of the entries, bringing the work more into line with modern international bibliographical practice.

The main entry for each book begins with the author's surname (if known) in **heavy type**. As an index to these "Author" records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words; the name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.* :—

**Baring-Gould** (Sabine)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of the year 1911, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Hearty thanks are due to many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it otherwise would have been.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of THE ENGLISH CATALOGUE OF BOOKS*, "Publishers' Circular" Office, 19, Adam Street, Strand, London, W.C.

# ANALYSIS OF BOOKS

## PUBLISHED IN 1911

---

THE number of books recorded as having been published during the year is 10,914, an increase of 110 on the total for 1910. This is the highest total ever recorded for a year's publishing in the United Kingdom. Owing to the events of the year, the rate of production has not been so steady as in average years, and the monthly totals vary from 673 in June (the Coronation month) to 1,527 (a record) in October. The following are the totals for the last ten years and last year :—

Year.	New books.	New editions.	Total.
1901 ..	4,955	.. 1,089	.. 6,044
1902 ..	5,839	.. 1,542	.. 7,381
1903 ..	6,699	.. 1,682	.. 8,381
1904 ..	6,456	.. 1,878	.. 8,334
1905 ..	6,817	.. 1,435	.. 8,252
1906 ..	6,985	.. 1,618	.. 8,603
1907 ..	7,701	.. 2,213	.. 9,914
1908 ..	7,512	.. 2,309	.. 9,821
1909 ..	8,446	.. 2,279	.. 10,725
1910 ..	8,468	.. 2,336	.. 10,804
1911 ..	8,530	.. 2,384	.. 10,914

This year the statistical analysis of book production has been brought into line with the classified table adopted by the International Congress of Librarians

at Brussels, in August, 1910. The new table is more detailed and exact than the one hitherto used.

So far as the two tables can be compared, the increase appears to be distributed evenly over all classes of literature. As year-books and pamphlets are now distributed over subjects, and not counted as separate classes as formerly, the exact figures of increases or decreases cannot be supplied. The largest *increases* have occurred in the following classes: Philosophy and Religion; Science and Technology; History and Biography; and Poetry and Drama; while it is probable that there have been slight decreases (omitting year-books, &c.), in Educational and Philology, and Medicine.

It should be noted that these figures do not include numerous ephemeral pamphlets, government leaflets and musical texts. If these were included, a large increase in the total would result; but the figures would not so accurately represent the book publishing activity of the United Kingdom.

The analytical tables appended supply further detailed information regarding the year's publishing.

## DIRECTORY OF PUBLISHERS

*Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers.*

*Those sent will be found below between square brackets [ ], and separated from each other by a semicolon ( ; )  
The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.*

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.

# **THE BOOKS OF**

---

# **1801-1836**

---

**T**HE published volumes of the ENGLISH CATALOGUE OF BOOKS do not go back beyond the year 1836.

Librarians, bibliographers and booksellers have always found the English books covering the earlier part of the Nineteenth Century, 1801—1836, the most difficult to trace, the trade catalogues for that period being very incomplete as regards the total number of entries, and insufficient as regards the individual entry.

A volume of the ENGLISH CATALOGUE, covering the period in question on modern lines, is now being compiled from the weekly and other trade lists, and other sources—the author, title and subject entries in one alphabet—supplying as far as possible all the information which is wanting in the “London” and “British” Catalogues.
